Hiruscar®

LATEST ADVANCED FORMULA

CLINICALLY PROVEN TO TREAT SURGICAL SCARS

Hiruscar® Silicone Pro

Suitable for:

GENTLY APPLY ON CLOSED WOUNDS 2 TO 3 TIMES A DAY, SPREADING OUTWARDS FROM CENTRE OF SCAR.

For existing scars, apply generously to the scar and massage gently for 2-3 minutes, 3-4 times a day.

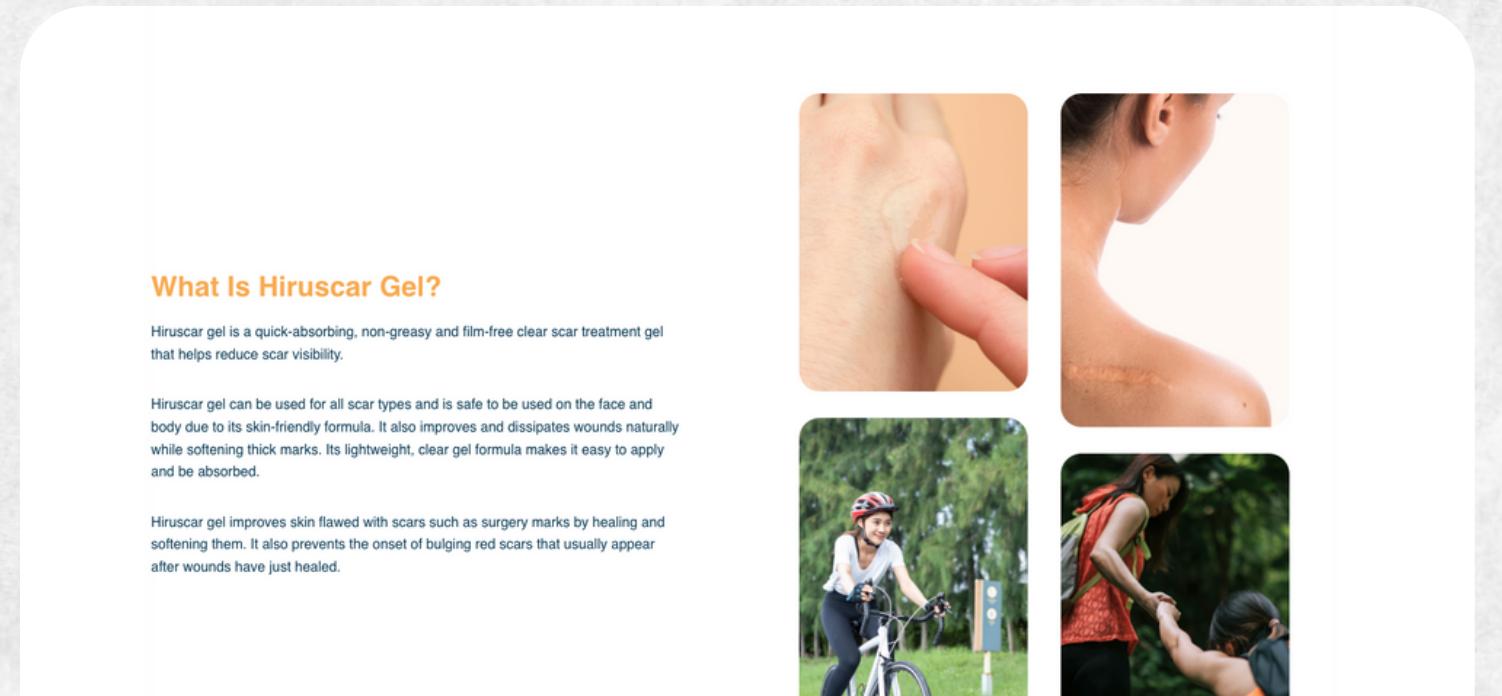

To prevent fresh wounds from leaving scars, once the wound has closed, apply 2-3 times a day.

UI and Graphic Design

It is a project of the Hiruscar Singapore website. I create graphics, and icons, then adjust some layouts on each web pages.

Home About Us Products ▾ Tips & Advice Contact

What Is Hiruscar Gel?

Hiruscar gel is a quick-absorbing, non-greasy and film-free clear scar treatment gel that helps reduce scar visibility.

Hiruscar gel can be used for all scar types and is safe to be used on the face and body due to its skin-friendly formula. It also improves and dissipates wounds naturally while softening thick marks. Its lightweight, clear gel formula makes it easy to apply and be absorbed.

Hiruscar gel improves skin flawed with scars such as surgery marks by healing and softening them. It also prevents the onset of bulging red scars that usually appear after wounds have just healed.

When to Use Hiruscar Kids?

Hiruscar Kids gel works effectively against kids' scars of less than 2 years old resulting from minor cuts, scratches, injuries and dark marks from insect bites. It can be used on the face and body due to its skin-friendly formula.

Gently apply on closed wounds 2 to 3 times a day, spreading outwards from centre of scar.

For existing scars, apply generously to the scar and massage gently for 2-3 minutes, 3-4 times a day.

To prevent fresh wounds from leaving scars, once the wound has closed, apply 2-3 times a day.

ABOUT US

Uplift Your Digital Life

Technology is never an enemy of humans. With the right resources, development, and guidance, it can change your business and life forever.

With 25 years of experience, MFEC is ready to be your technical partner who transforms your businesses into Technology-Driven Enterprise through the best workforce and premium services. Together, let MFEC be a part of your success in uplifting the society's digital life.

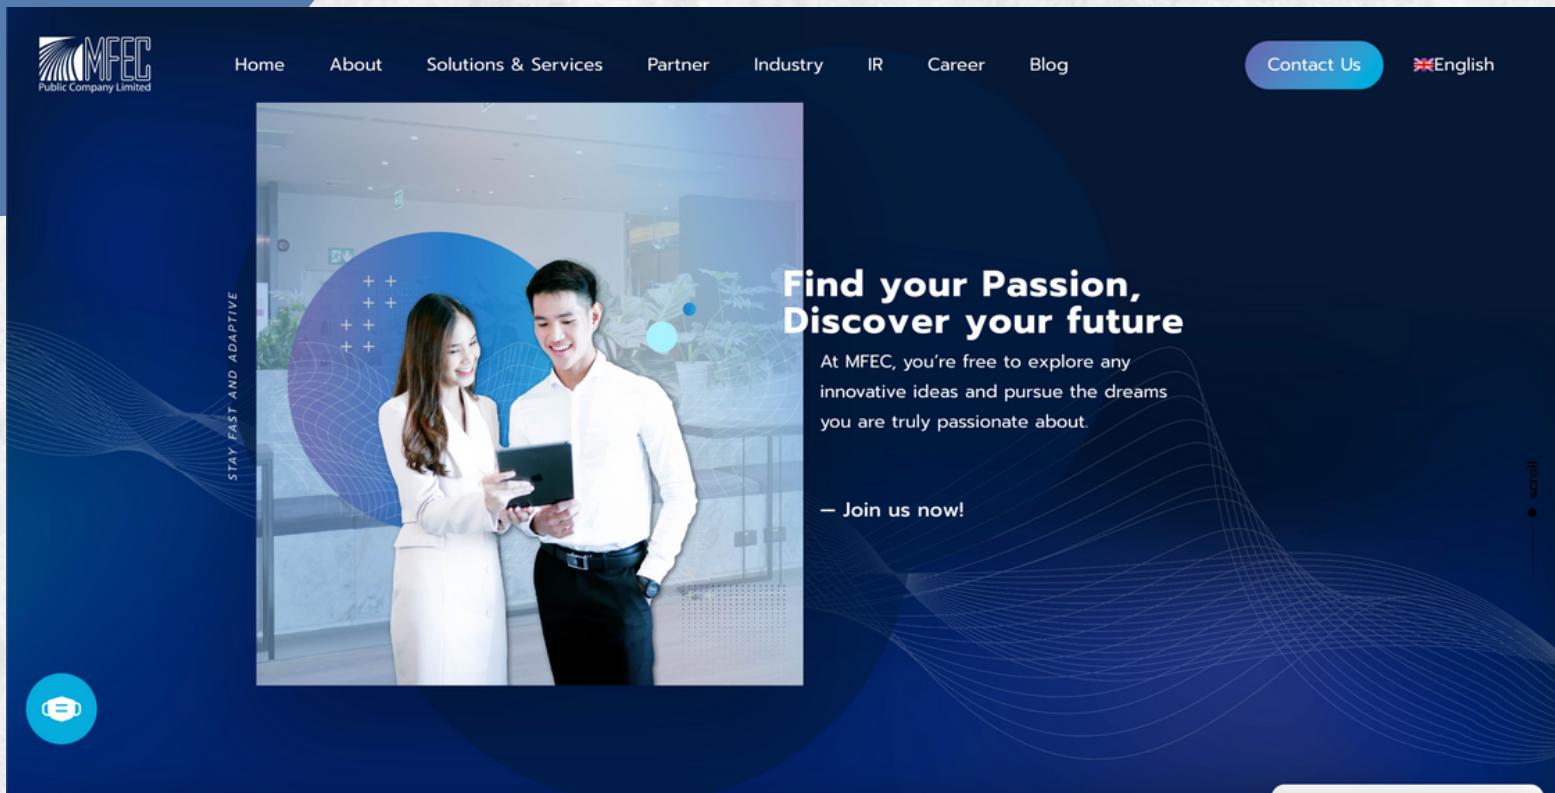

UX/UI Design

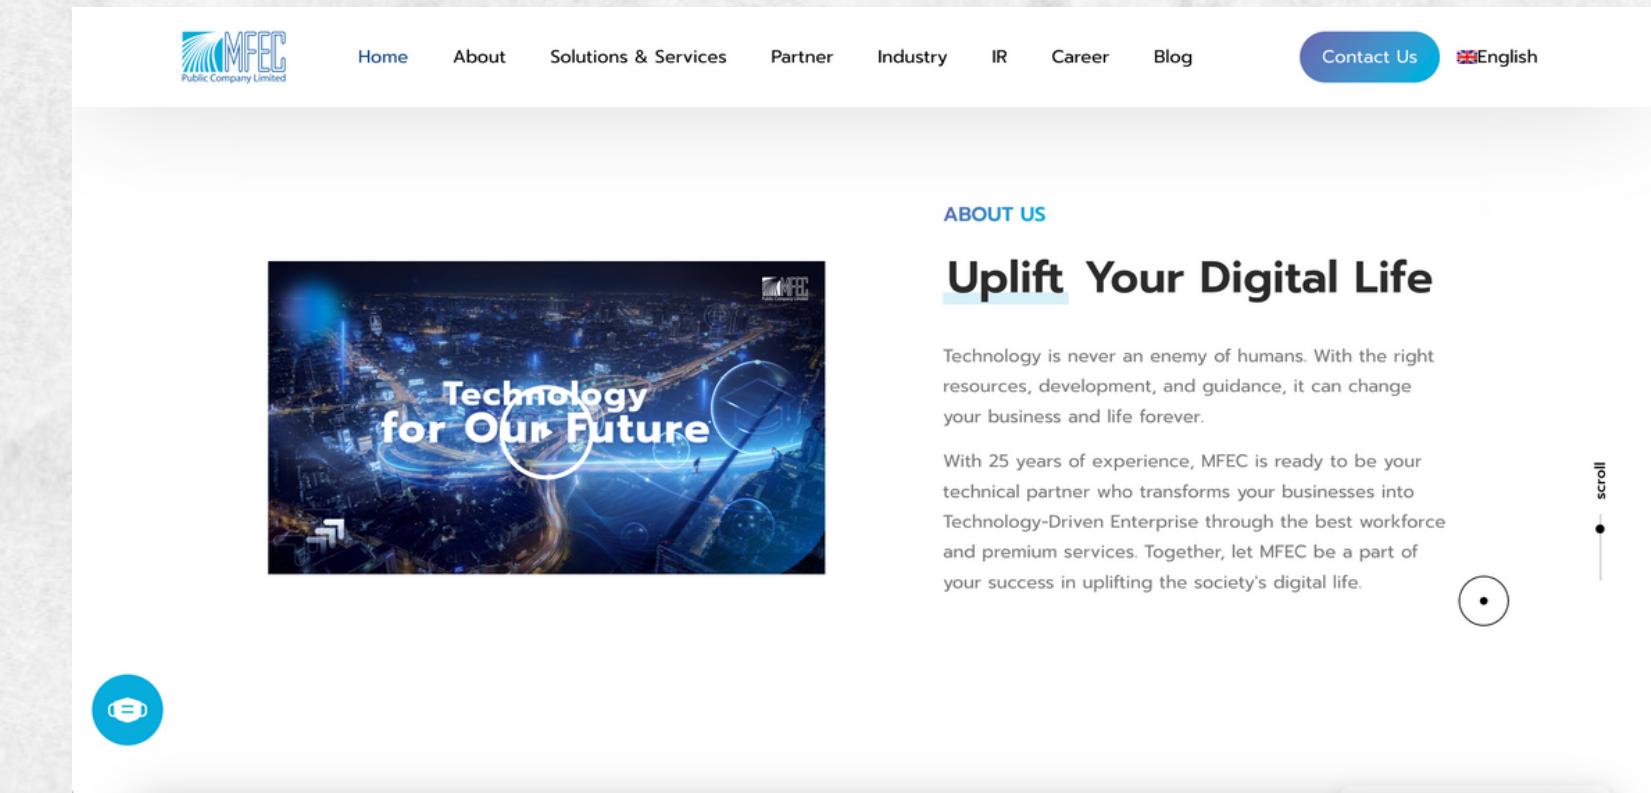

It is a project re-design the new main website of MFEC Public Company Limited in 2022.

<https://www.mfec.co.th/en/>

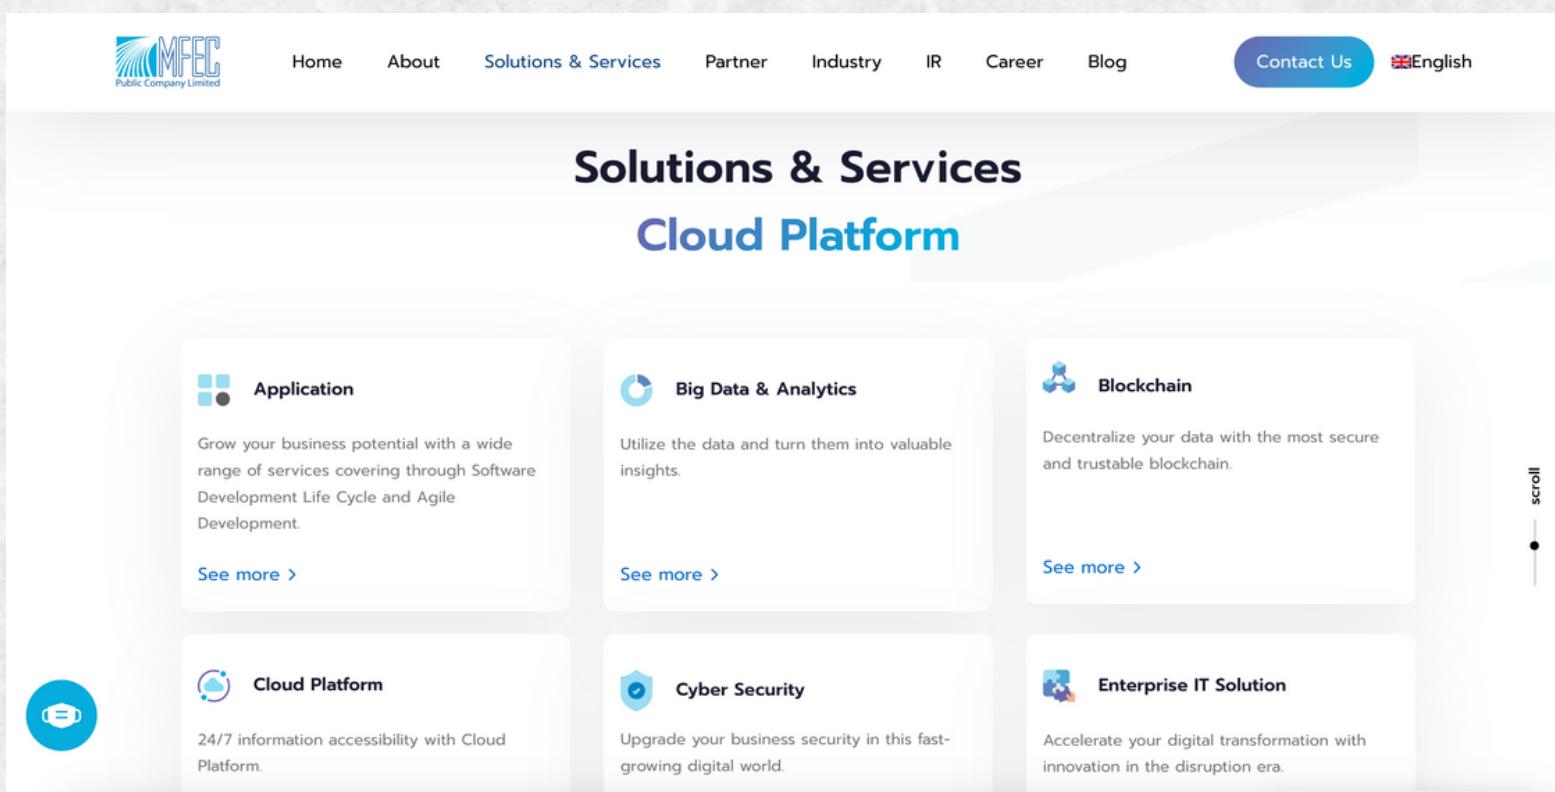

Sample Re-design MFEC Website in 2022

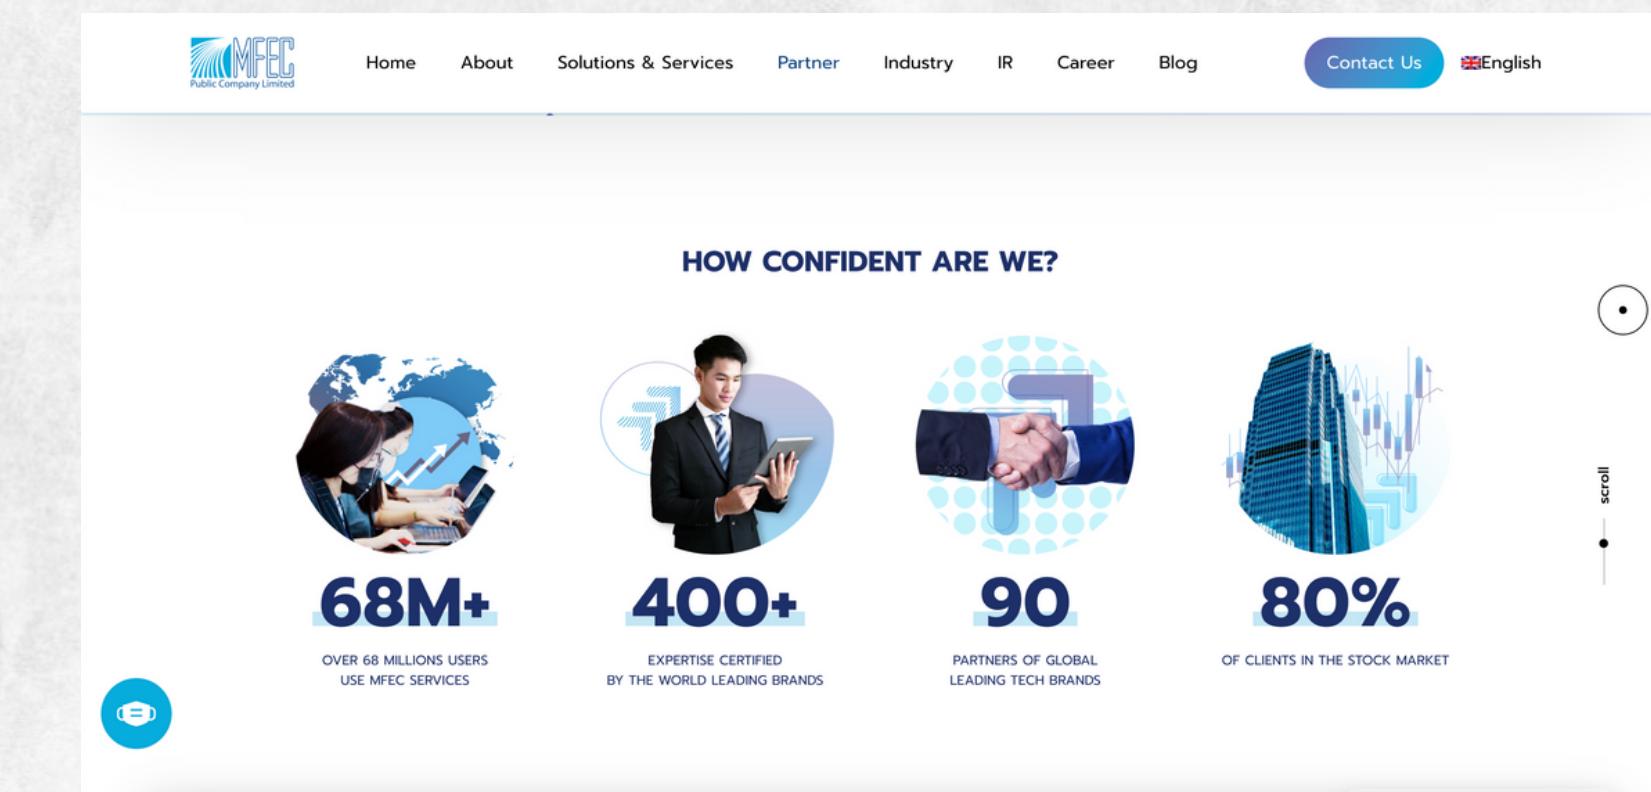

The header features the MFEC logo and navigation links: Home, About, Solutions & Services, Partner, Industry, IR, Career, Blog, Contact Us, and English. A large banner image shows two professionals looking at a tablet, with the text "Find your Passion, Discover your future". Below the banner is a quote: "At MFEC, you're free to explore any innovative ideas and pursue the dreams you are truly passionate about." A call-to-action button says "Join us now!".

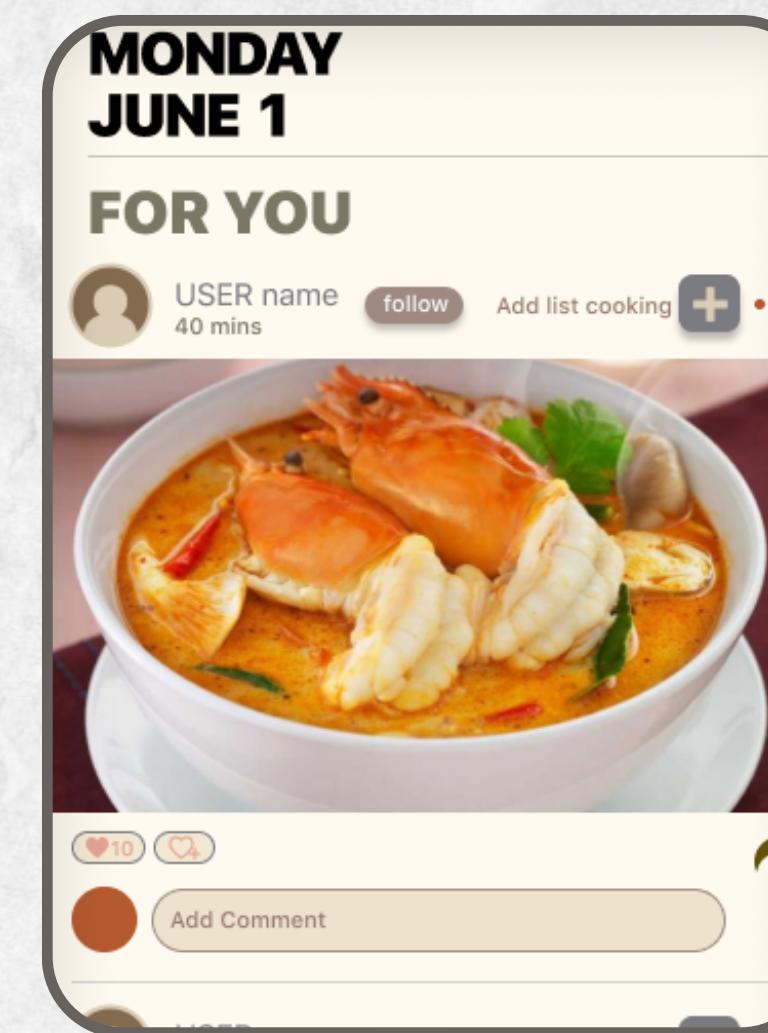

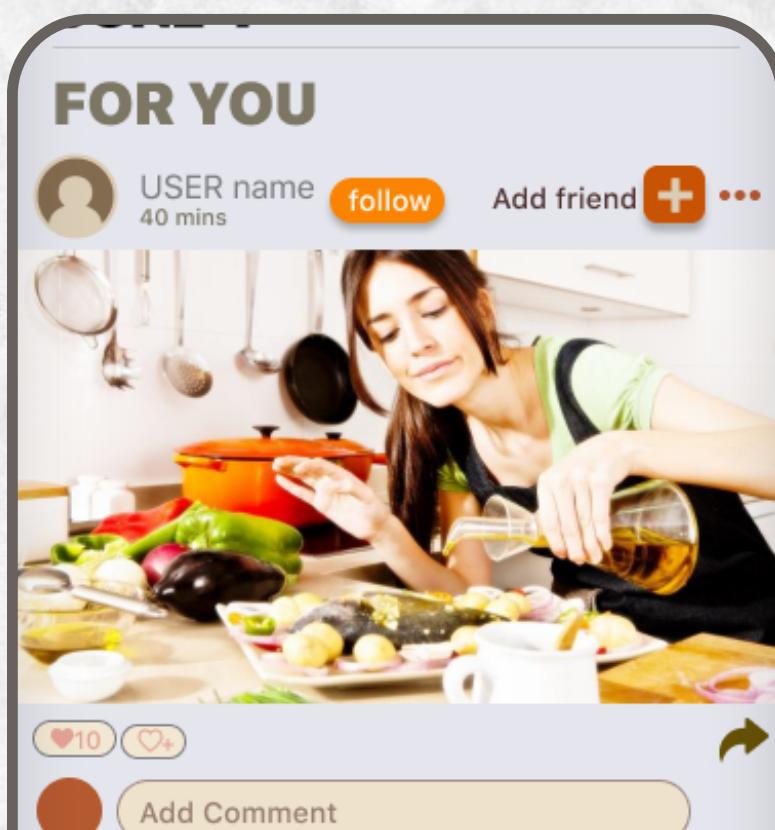

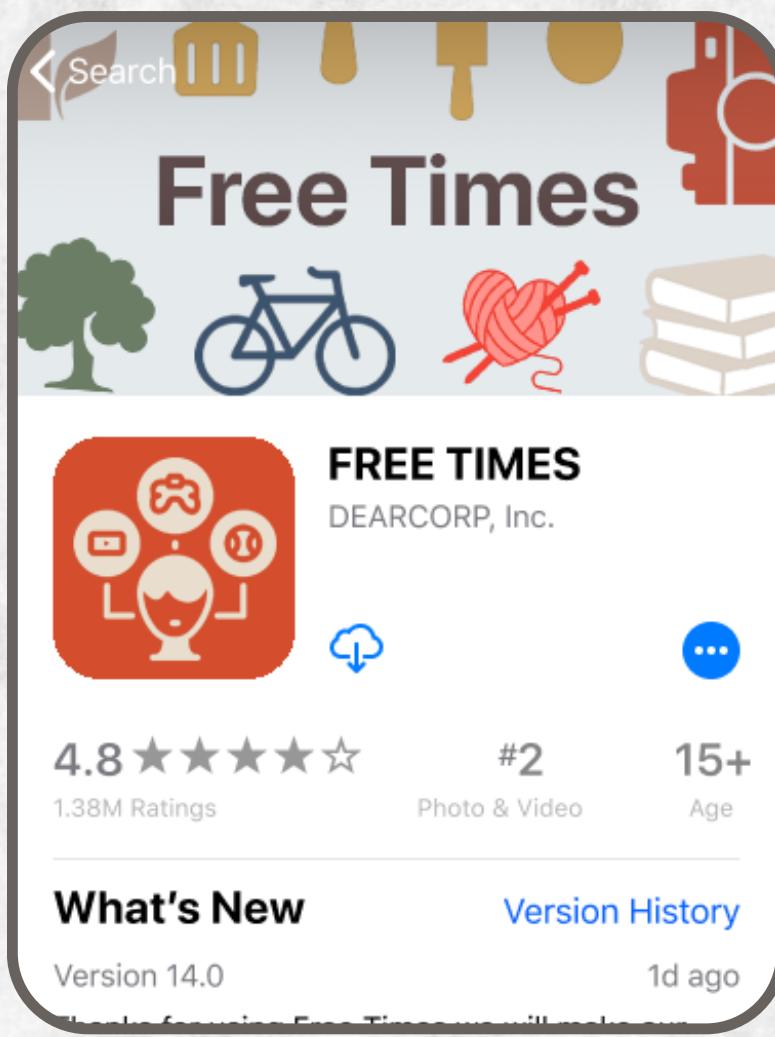

The header features the MFEC logo and navigation links: Home, About, Solutions & Services, Partner, Industry, IR, Career, Blog, Contact Us, and English. A large banner image shows a futuristic cityscape with the text "Technology for Our Future". To the right, the "ABOUT US" section includes the heading "Uplift Your Digital Life" and a paragraph: "Technology is never an enemy of humans. With the right resources, development, and guidance, it can change your business and life forever." Below this is another paragraph: "With 25 years of experience, MFEC is ready to be your technical partner who transforms your businesses into Technology-Driven Enterprise through the best workforce and premium services. Together, let MFEC be a part of your success in uplifting the society's digital life."

The page title is "Solutions & Services". Under "Cloud Platform", there are four cards: "Application", "Big Data & Analytics", "Blockchain", and "Enterprise IT Solution". Each card has a brief description and a "See more >" link. At the bottom, there are two more cards: "Cloud Platform" and "Cyber Security".

The page title is "Solutions & Services". The "HOW CONFIDENT ARE WE?" section features four icons with statistics: "68M+" (Over 68 million users), "400+" (Expertise certified by world leading brands), "90" (Partners of global leading tech brands), and "80%" (Of clients in the stock market). Below each icon is a brief description.

Graphic Design at **MFEC Public Company Limited**

It's a graphic designer for general work consisting of web page design and a design of advertising media and promoting events.

A promotional graphic for MSyne Innovations. At the top right is the MSyne Innovations logo, which consists of a stylized blue 'M' icon followed by the text "MSyne" and "Innovations" below it. The main title "Check Out Available Positions" is displayed in a large, bold, white font with a blue outline. Below the title, there are five isometric icons representing different job roles: "Data Platform Engineer" (showing a person working with server racks and clouds), "Project Manager (Big Data, Data Management)" (showing a person working on a laptop with a chart titled "DATA ALERT"), "Test Manager/Test Leader" (showing a person working on a laptop with a grid background), "Business Analyst" (showing a person working on a laptop with a magnifying glass over a document titled "ANALYSTS"), and "Data Engineer" (showing a person working on a laptop with a stack of data storage units). Each icon has its corresponding role name written below it in white text.

A dark-themed slide with a purple header bar. On the left is the MFEC logo and a "Data Driven" graphic. The center text reads "More than 100 Projects of MFEC in 2021" in white, followed by "Towards" and "Technology-Driven Enterprise" in a larger, purple, italicized font. Below this text are three small images showing groups of people at what appears to be a company event or presentation. The bottom right corner contains the text "MFEC AYU & partner Microsoft Thailand's Partner Award".

A dark-themed slide featuring the MSyne Innovations logo at the top. The main text "Big Data Implementation" is prominently displayed in a large, white, 3D-style font. Below the text is a 3D isometric illustration of a cityscape built on a grid of data bars. A small figure of a person stands on one of the bars, and a laptop screen in the foreground displays a chart with the text "Data".

Graphic Design & Branding at DKSH

Create graphics for partner promotion and Business Units in the company. And I work in the Marketing department (co-working Global Market)

DKSH

Three Reasons + Why Brand Owning Healthcare Companies Choose to Outsource

In our recent Route to Market survey conducted by DKSH, respondents from pharmaceutical, consumer health, and medical device companies state these top three reasons outsourcing can benefit their businesses.

Ease of Market Expansion
Commercial outsourcing allows brands to expand their geographical reach in existing markets while also penetrating new locations. By partnering with a commercial outsourcing provider such as DKSH, brands will also have access to a capillary distribution network of thousands of customers and partners in diverse channels.
An outsourcing provider will also have in-depth knowledge and understanding of local markets and regulations as well as regulatory restrictions, making market entry an easier process.

New Product Launches
In a complex market, brands strive to successfully launch new products and quickly gain more sales. With support from a professional commercial outsourcing partner who has experienced, high-performance teams of sales and marketing experts such as DKSH, brands can start penetrating new markets with their new products straight away and skip the processes of conducting market research, planning, sales strategies, and forming new sales and marketing teams, hence, allowing businesses to reduce fixed costs.

Optimizing Sales Growth for Mature Products
When a product enters its maturity stage, sales often start to decline. But if managed properly, a mature product can still be a revenue generator. Commercial outsourcing partners can support brands in reinvigorating products to grow by introducing products to new targets, retaining loyal customers, reviving sales through omni-channel approach as well as providing value-added services.

Delivering Growth – in Asia and Beyond.

Four Reasons Why Ethics and Compliance Are Important for Patient Support Programs

Compliance and ethics are often emphasized as being one of the key components for a successful patient support program (PSP) as collecting both positive and negative information and data about patient experience and outcomes is a crucial element to enhancing the patient journey.

Building a Culture of Ethics and Compliance Across Functions

PSPs can have various forms and structures so all relevant functions must be involved in the discussion as it is important to have different perspectives covered in analyzing the risks, market access, medical, legal, data privacy, and other key processes. It must be clearly outlined how everyone is going to interact and how the program is structured as we are seeing more regulations being introduced with the intent of protecting patients' privacy and ensuring that providers establish the proper interactions with patients.

Ethics and Compliance Affect Patients' Privacy

PSPs generate a lot of sensitive information which needs to be protected and used correctly to avoid unwanted consequences to pharmaceutical companies. To protect patients' privacy, we are seeing a clear surge in government enforcement when it comes to patient data with several well-known cases having been investigated and sanctioned.

Tailored Ethics and Compliance Standards for PSPs Are Crucial

As PSPs are a relatively new concept in Asia, providers need to raise the ethical bar in these programs and apply the general compliance principles and ethical standards to all activities. Compliance professionals need to also tailor PSPs with seasonal ethics and compliance guidelines or standard operating procedures that meet the needs of each business.

Reputations at Stake

When an infringement occurs related to ethics and compliance, the company's reputation is at risk, especially when news is released to the public. While the loss of business is the visible consequence, what this means for the team is that the integrity of the procedure and the process of the PSP has failed. Since PSP's objective is to assist patients to get the right treatment, when we compromise ethics and compliance to gain an unfair business advantage, it means the provider has let the patient down by delivering them inadequate treatment.
